PROFILE

AI-driven **Content Producer & Pipeline Architect** with a proven track record of commercial campaigns for Tier-1 markets (US / UK / EU). I design fully automated **"content factories"** and produce cinematic, viral short-form video — pairing advanced prompt engineering with end-to-end automation built in **Claude Code**. Scaled an organic audience to **120,000+ followers** and **50,000,000+ views** across platforms in just 6 months, with zero ad spend.

WHAT I DO

01 Multi-Modal Prompt Engineering

Expert prompt design across text, image, video & sound — a formal method (camera → subject → scene → lighting) for cinematic results at scale.

03 Viral Short-Form

Reels, Shorts & TikTok engineered to travel — from high-converting ad clips to expressive visual stories with a real wow-effect.

05 AI Voice & Sound

Voice-over via AI synthesis with genuine intonation and acting delivery, plus music and audio beds tuned to the scene.

02 Concept, Script & Storyboard

Scripts, narrative structure, visual concepts, storyboards, action beats, imagery and atmosphere — built to hold attention.

04 Content Factories

End-to-end automated production pipelines that carry a concept all the way to finished, published content.

06 Edit, Post & Delivery

Final cut, color and export with professional post-production — brand- and art-directed, delivery-ready for every platform.
